DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-28, is drawn to a helmet with an inertial measurement system drawn to 359/631.

Group 2, claim(s) 29-30, is drawn to pupil movement detection 351/209.

2. Group 1 contains special technical feature of a processing system which derives helmet position data. Group 2 contains a special technical feature of deriving a current pupil gaze direction based on both pupil location and a position of direct corneal reflection. As the groups do not share a special technical feature, they are not linked as to form a single general inventive concept.

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination II has

separate utility such as a method of detecting gaze direction which may be used in presentation of virtual reality. See MPEP § 806.05(d).
